

BATTERY TERMINALS / CLAMPS

Deeco's extensive research and development for Battery Terminals/Clamps has resulted in many innovative advantages for our customers. These advantages include;

- Increased productivity
- Improved safety
- Corrosion resistance
- Environmentally safe

Very few industrial metal companies in the world can offer the vast and competent level of product knowledge Deeco brings to the table. We provide an open door to an unequaled assortment of metallurgical experts and technical specialists in every imaginable field of expertise in our industry.

DEECO has been supplying the metals industry with superior quality products from premier manufacturers both domestically and from around the world for over a decade. Our customer list demonstrates our commitment to providing outstanding levels of customer service and includes the United States Government, Teledyne, companies of General Motors and Ford Motor Company, Boeing, Los Alamos and Brookhaven National Labs. Deeco can partner with your own research and development team to be sure you are getting the best material for the job, including investigating alternative materials that reduce cost and increase production.

There really *is* a difference in metal suppliers, experience the Deeco difference by calling us today.

Bringing the world of metals to your door.
